

## Carboline President Richard M. Wilson Visite SNERDI

Carboline President Richard M. Wilson, the Vice President David Wolf, the Chairman of Carboline Korea branch David Lee and the General Manager with a row of 7 people paid a visite to Shanghai Nuclear Engineering Research & Design Institute for technical interchange on Nov. 16, 2010. The Vice President of SNERDI Fuzu Miao headed the technical personnel who were from the Engineering Equipment Institute to show a worm welcome to all the guests.

Carboline is a world famous company who has been developing, manufacturing and marketing high performance protective coatings for the fields of Power Plant, Petrochemicals, Marine & Port Machinery and Bridge & Highway. Up till now, the Company has been the leading coating supplier for AP1000 Project, Korea APR1400 Nuclear Project and so on.

General Manager (China based) Geun Young Lee gave a description of the development of the corporations, the processing and inspection for nuclear coatings production. Fuzu Miao also gave a brief introduction of the development of SNERDI and the Nuclear Project they've taken. There was a candid interactive communication about AP1000 nuclear coatings technology on both sides, and they agreed that they would work in close liaison with each other and pave the way to still closer forms of joint action.
